## **Heuristic Analysis**

We Looked At **36 different data points** - spanning from categories of 'problem awareness' to 'supporting purchasing decision making'

blue boxes were "conventions to utilize" (used by 2 out of 3 competitors)

pink boxes were "opportunities to shine" (areas neglected by all 3 competitors)

Heuristic Analysis

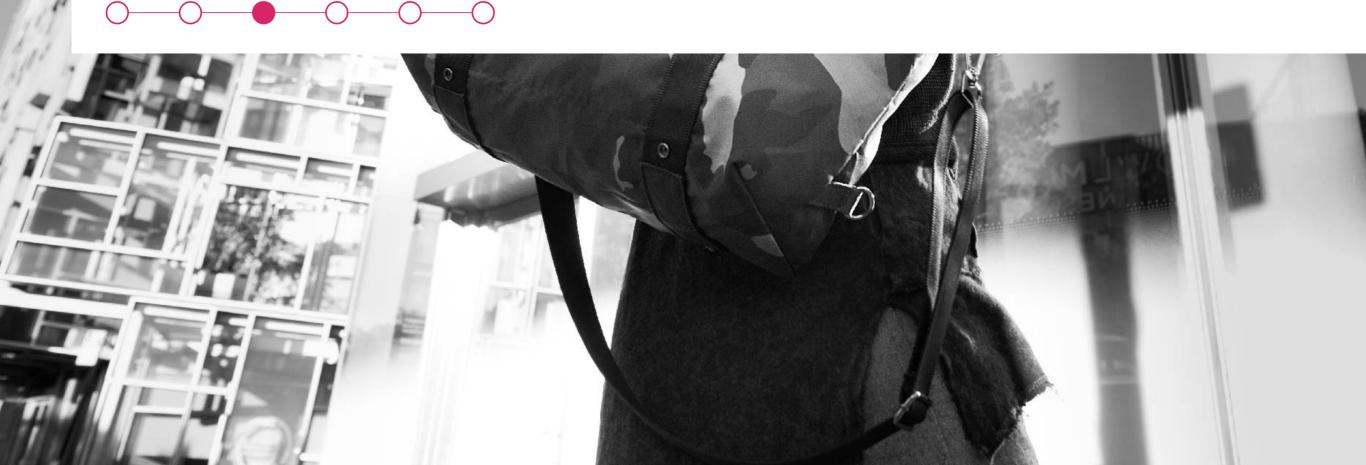

Blue = Heuristics that at least 2 out of 3 competitors are already doing well, these may be useful conventions

Pink = Heuristics that other competitors are not currently doing well, these may be opportunities to shine

strations with the bag	I actually couldn't decide between the large and the smaller size. I expected it to be a little bigger. I didn't want something as big as the weekender. I feel that carrying two bags is annoying so I want something that can hold a lot and has pouches that I can keep things in in case I forget them. It could be a little wider at the bottom because I have to stack my sneakers instead of putting them side by side. But otherwise, it's perfect for what I use it for	Outside pockets don't have zipper to secure items.	Everything is great. No frustration. I've gotten my mom and sister into it.
